

**The Business Continuity Institute (BCI) Professional Practices Training
Business Continuity Management System (BCMS) Audit
Classroom-based, Instructor-led, and Interactive Learning Environment**

Course Overview

This course has primarily been designed for professionals who have the task of leading or conducting a Business Continuity Management System (BCMS) Audit within their organization. This course is also suitable for those individuals who are involved in an internal BCMS audit process or who are subject to an external BCMS audit by a third party and wish to have a thorough understanding of the process. Learning about their role in the business continuity management process can help auditors to provide recommendations that will enable organizations to be one step ahead of the game when disaster strikes. The principles taught in this course can be used to audit against any BCM Standard or Framework, including ISO 22301, BS 25999, NFPA, ASIS-BCM and SS540.

Course Objectives

The objectives of this training course are to provide participants with the ability to:

- Review requirements of a Business Continuity Management System
- Understand purpose of auditing the business continuity management system
- Understand auditing principles, processes, and methodology
- Practice preparing for and conducting a BCMS Audit
- Learn to write audit reports
- Audit closure
