

**The Business Continuity Institute (BCI) Professional Practices Training  
Policy and Programme Management**

**Classroom-based, Instructor-led, and Interactive Learning Environment**

**Course Overview**

This course covers all aspects of creating and managing a successful Business Continuity policy and a Business Continuity Management programme in an organization. This is often the stage of the Business Continuity Management Lifecycle where practitioners have to begin in any new role, and is essential to regularly revisit and review in any existing role. This course provides the continuity and resilience professional with the ability to identify key aspects of a successful policy and develop or revise one where required. Participants will then learn how to use the BC policy to create, implement and manage the BCM programme as a part of building and improving organizational resilience. This course is based on the Good Practice Guidelines 2013 and reflects the current global thinking from BS ISO 22301:2014.

**Implementing a BCM programme**

**Course Objectives**

The objectives of this training course are to provide participants with the ability to:

- Identify and develop the key aspects of a successful BC Policy;
- Implement a BC Policy;
- Use the BC Policy to create, implement and manage the BCM programme; and
- Use the BCM programme as a tool to build organizational resilience.

**Who Should Attend?**

Business Continuity and resilience practitioners who are responsible for BC Policy and BCM Programme Management. It is recommended that participants have a minimum of a CBCI or equivalent credential with experience working in an organization in a continuity and resilience related role.
